INTRODUCTION

CLIENT

Al Rawi - Al Majaz Waterfront, Sharjah, UAE

ABOUT

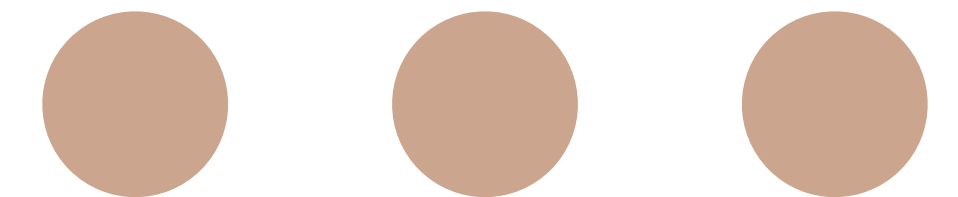

Al Rawi, is a hub for the Emirate's creative community, with a cafe, restaurant, bookstore, events space and creative zone for children. It's also an extension of Sheikha Bodour's publishing company and is one of the driving forces behind Sharjah's literature festival.

CHALLENGE

I was contacted by Sheikha Bodour's management company, Tetra, to work on this new project and evaluate how I can add value to this amazing hub for the Emirate's creative community in Sharjah.

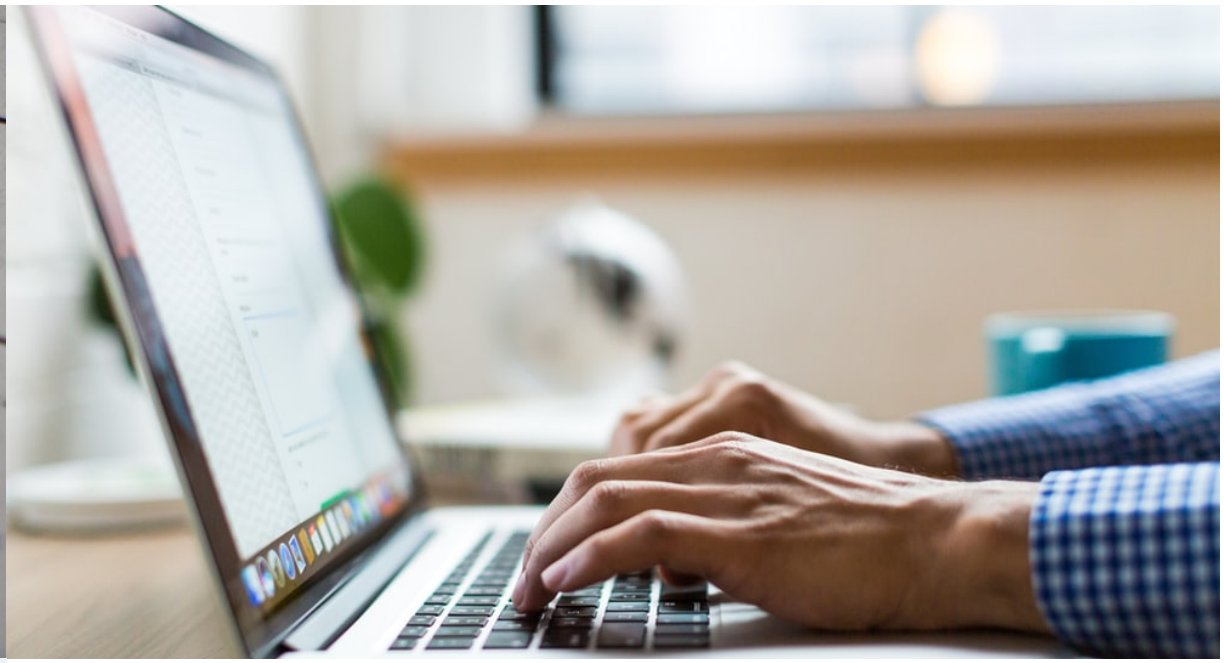

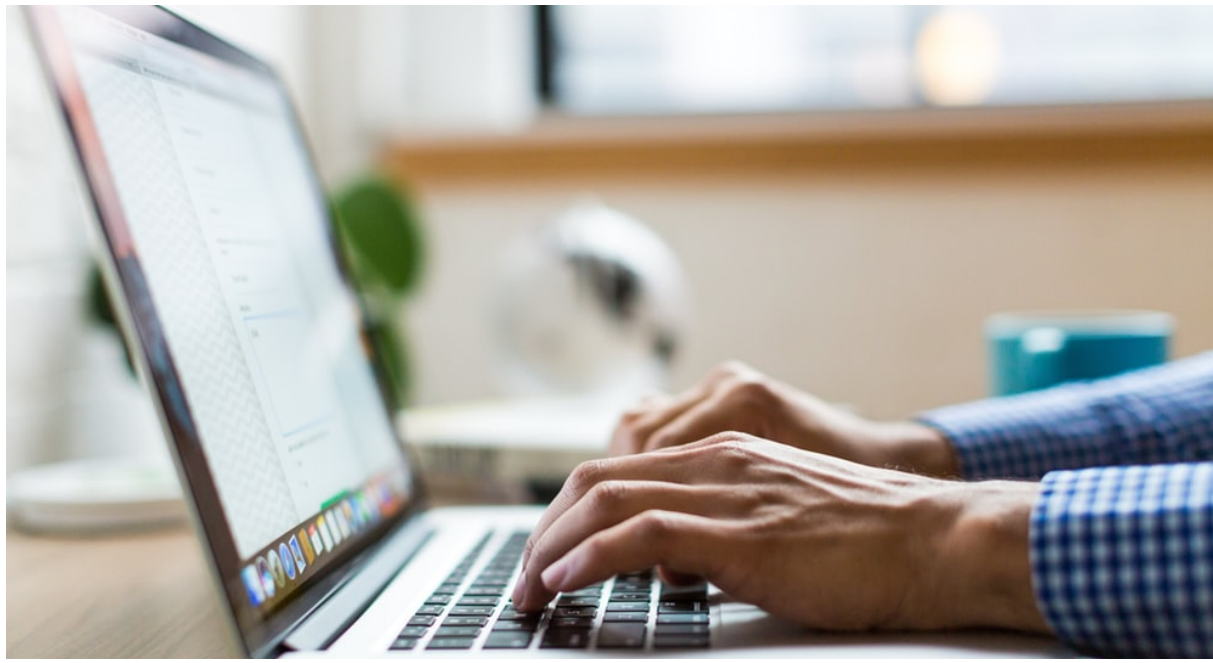

In Al Rawi, paper menus are used to display food items and pictures. However, those don't always look the best and can't show a lot of information and pictures.

To create a paper menu it has to be typed first and then printed.

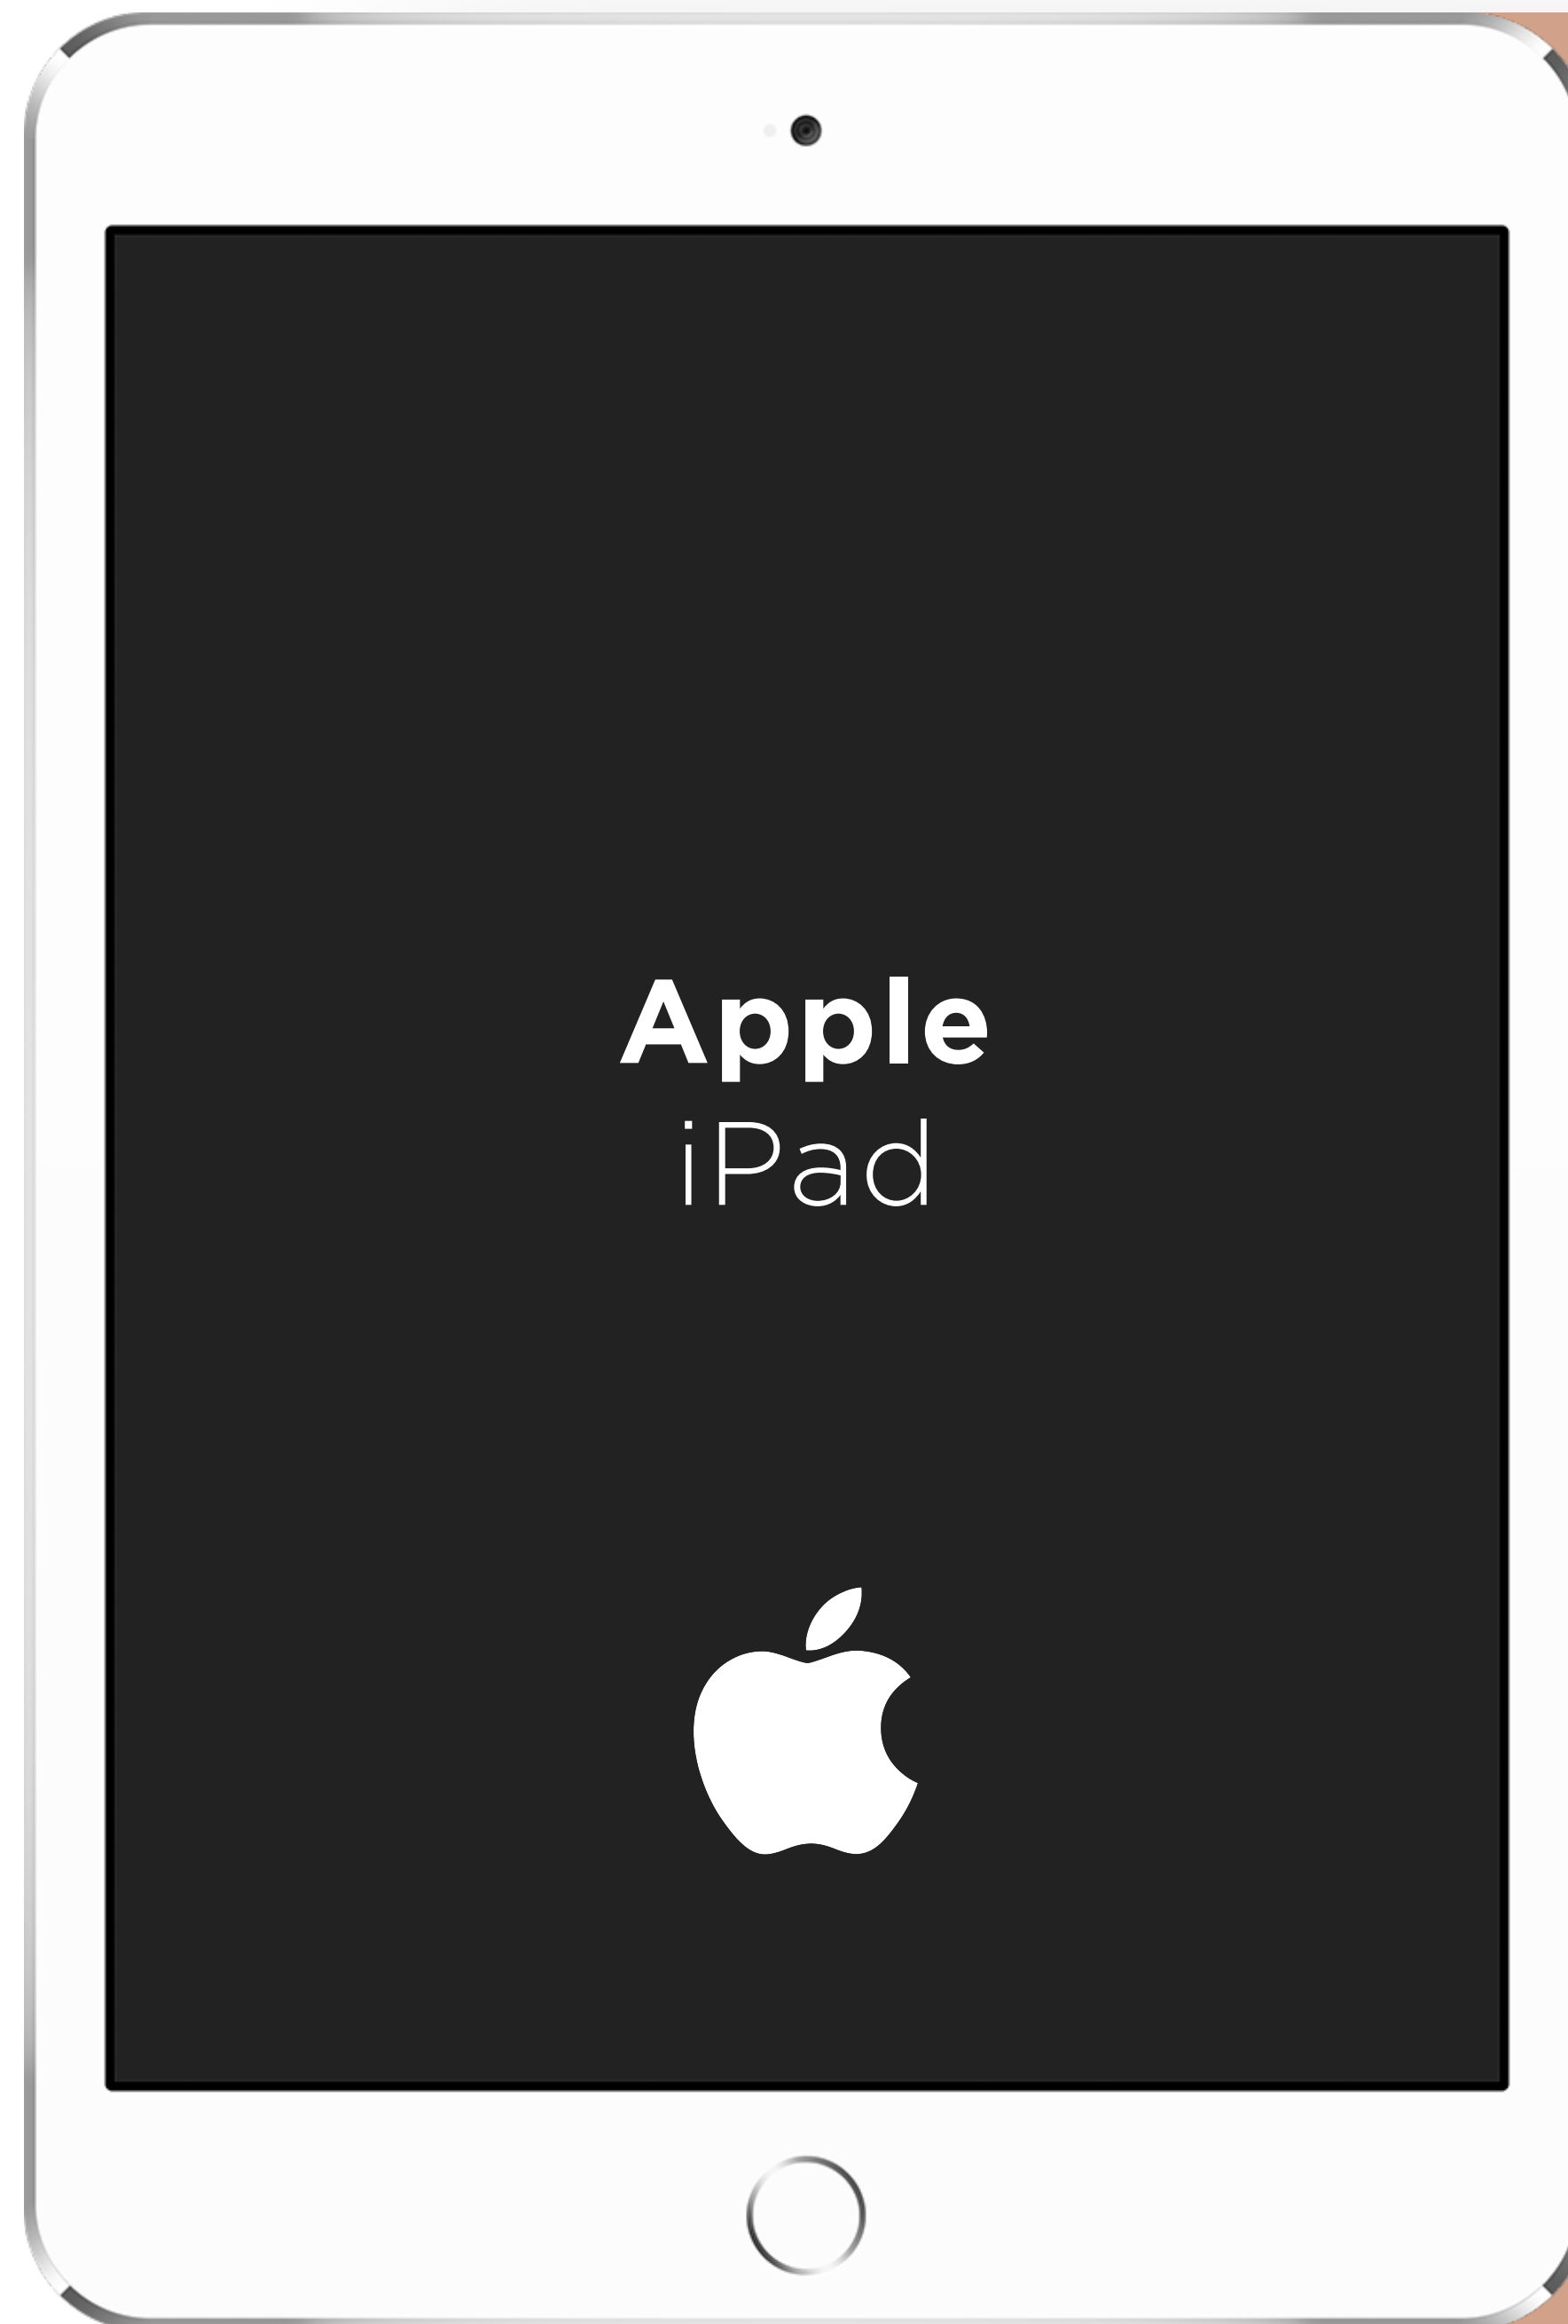

And if there are mistakes they have to be corrected, hence the whole menu needs to be reprinted.

A reprint will also occur if the restaurant adds or takes off a food item. Or if prices need to be adjusted.

This is a huge waste of paper and time.

But there is a solution to this, which doesn't require any paper, is quick, easy and produces no waste.

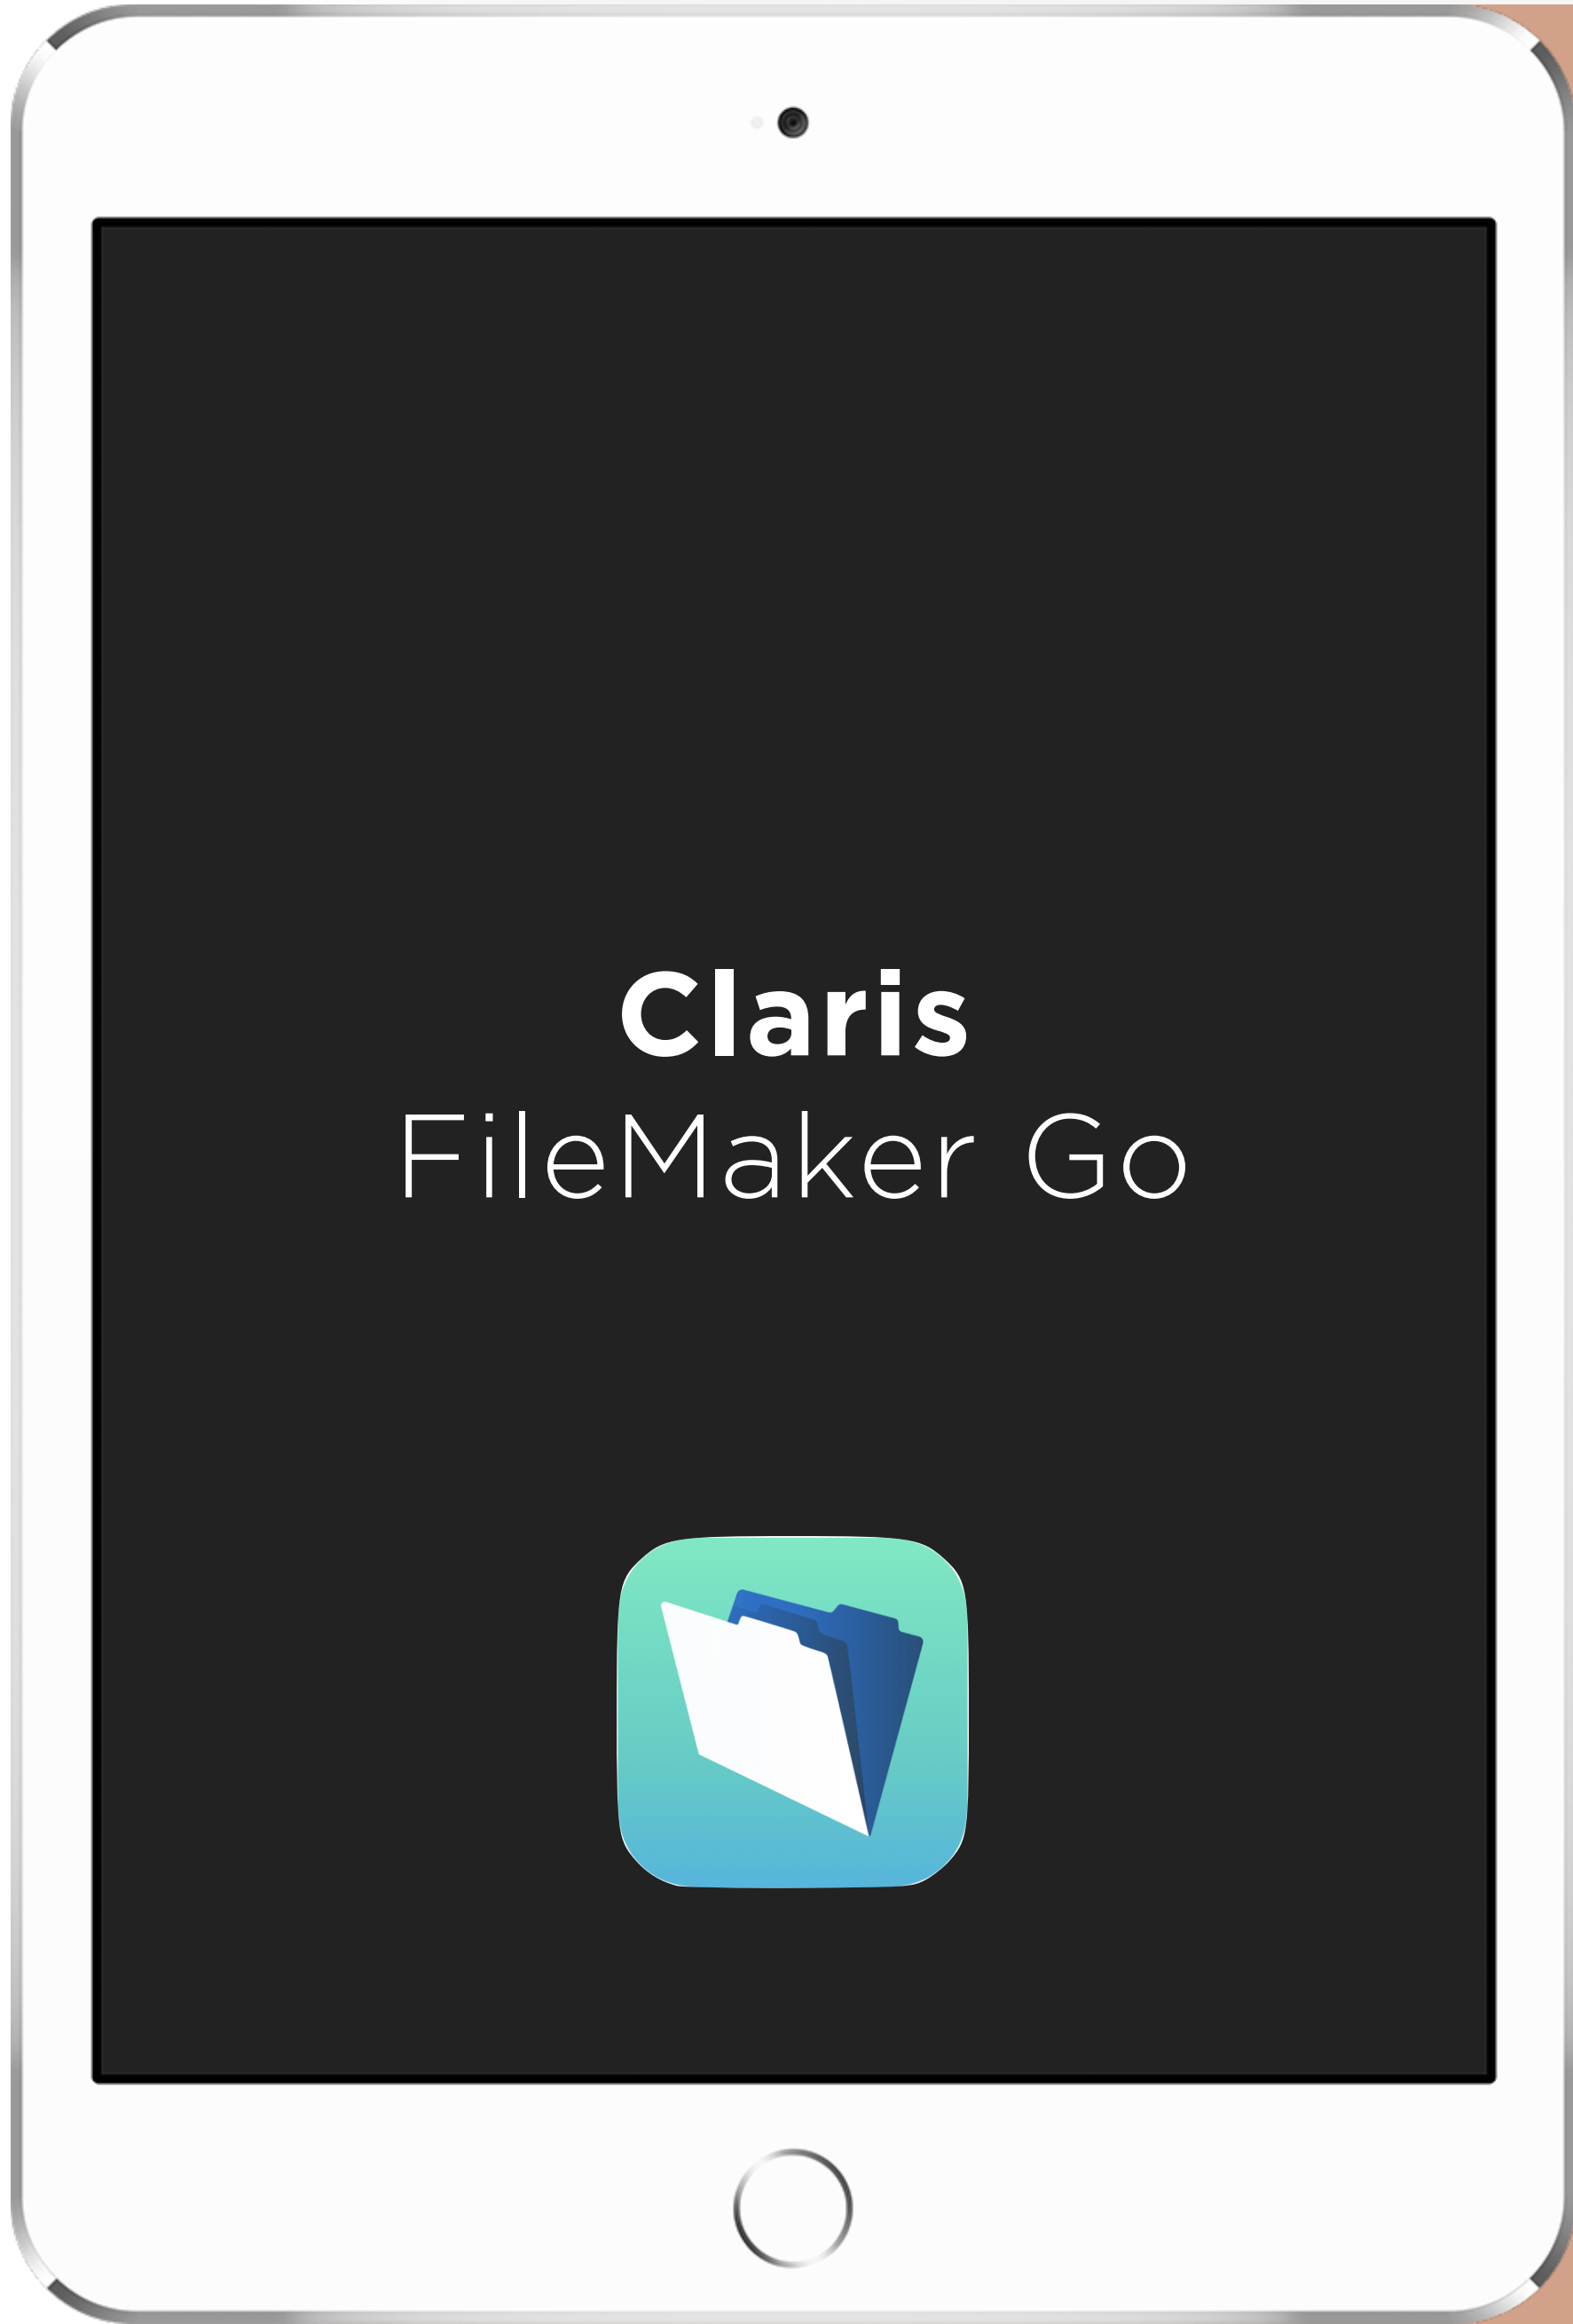

IPAD SOLUTION

iPad is a line of tablet computers by Apple Inc.

The iPad features a touch screen that users can interact with directly.

The most notable features of the iPad are its vibrant display and long battery life.

Claris FileMaker Go

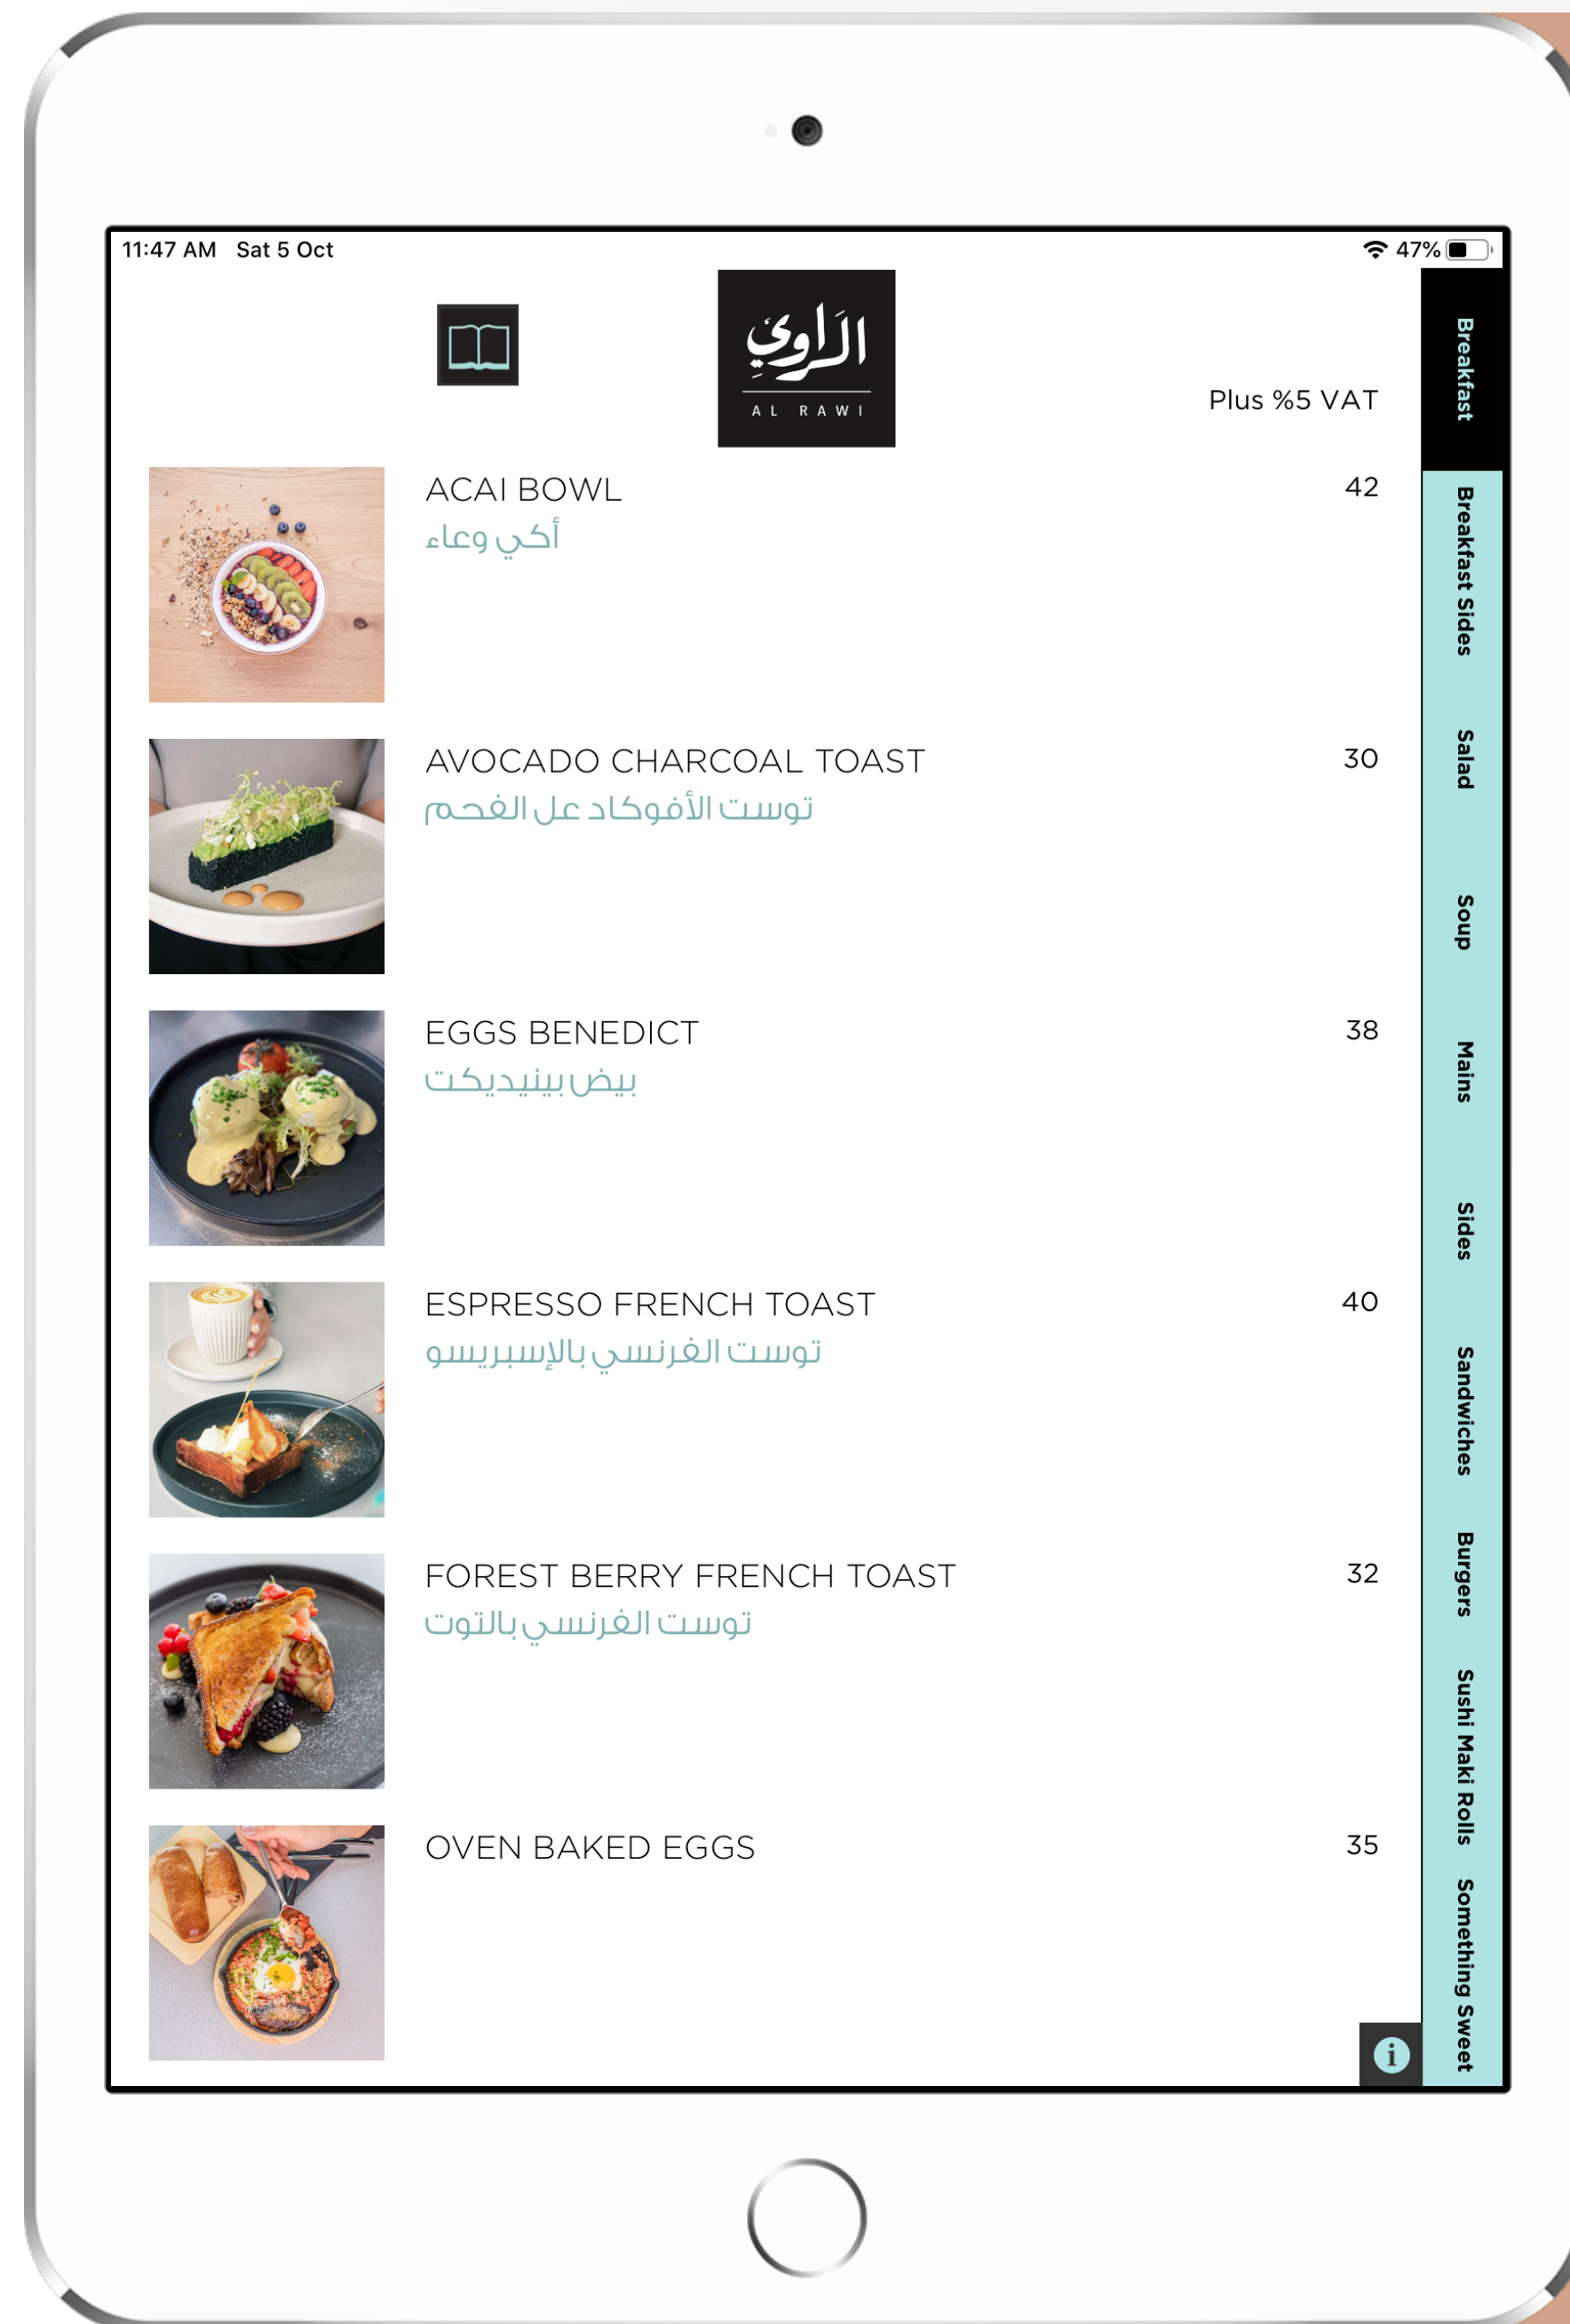

FILEMAKER CUSTOM SOFTWARE

FileMaker is a cross-platform programming software that allows creating custom solutions.

With FileMaker it is possible to display much more information than a paper menu. And it can be done with just an iPad.

FOOD MENU

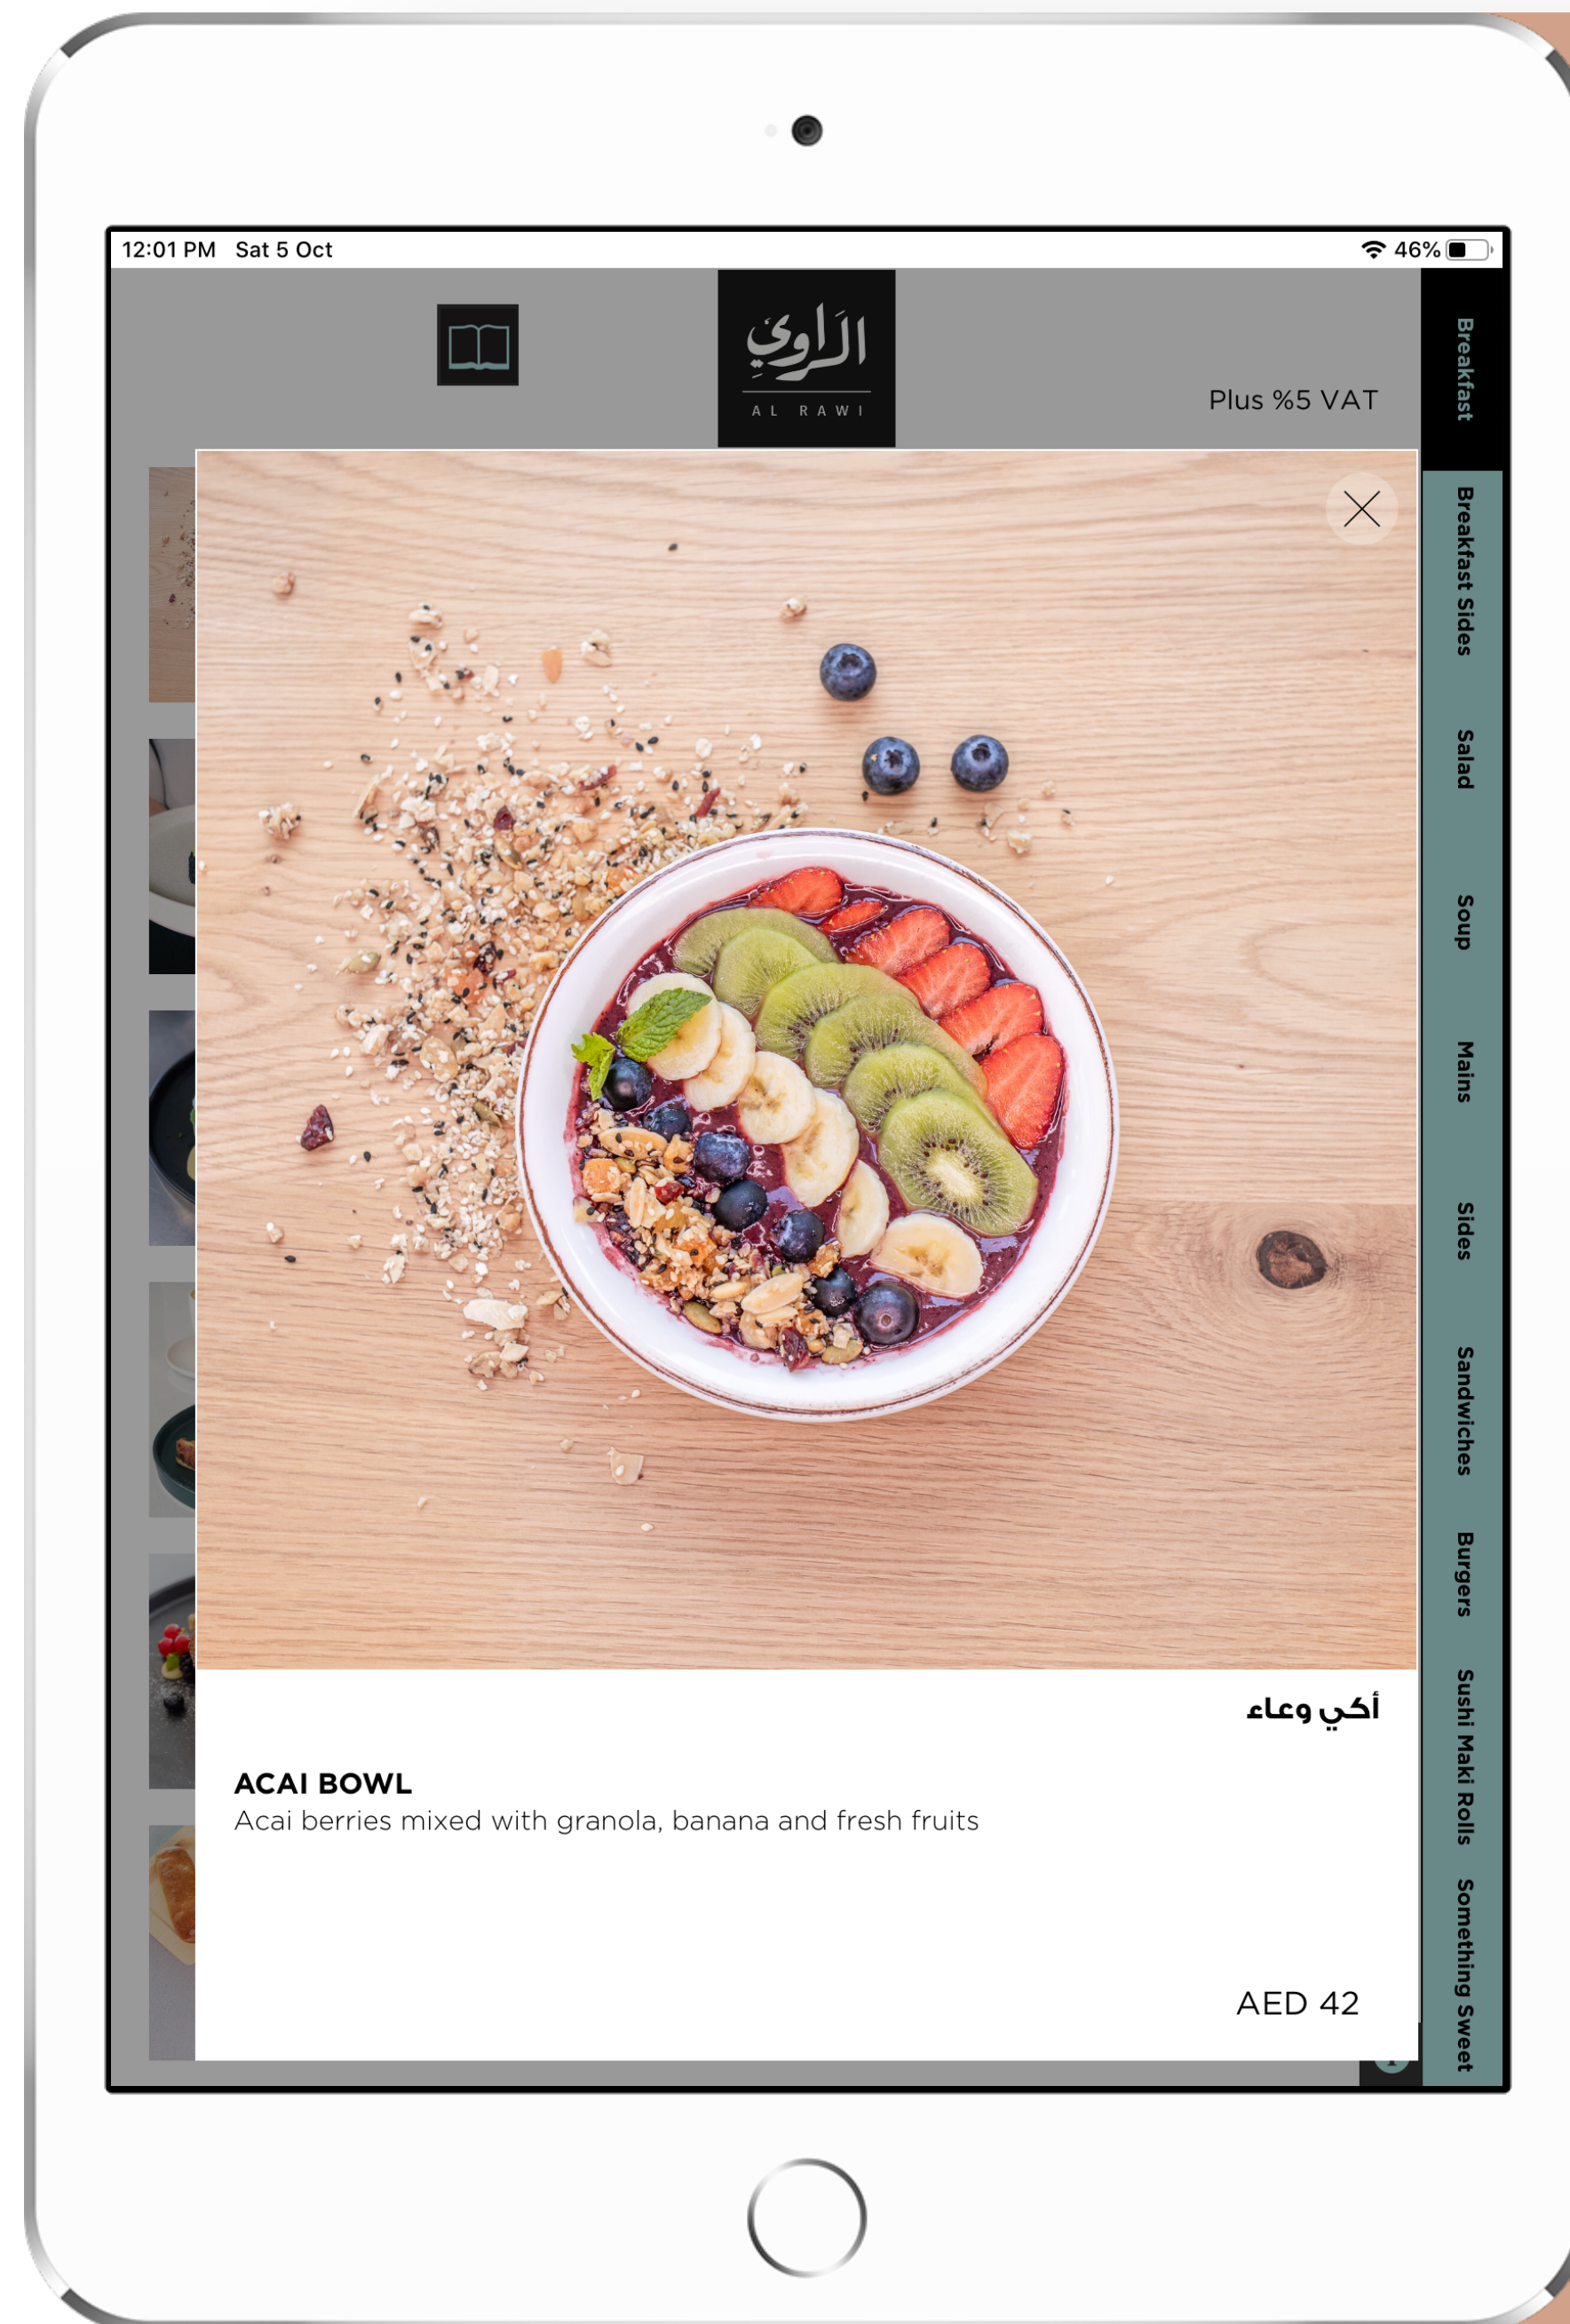

SIMPLE TO USE

Quick and easy to use for the customers.

With an iPad everything is just a tap or a scroll away.

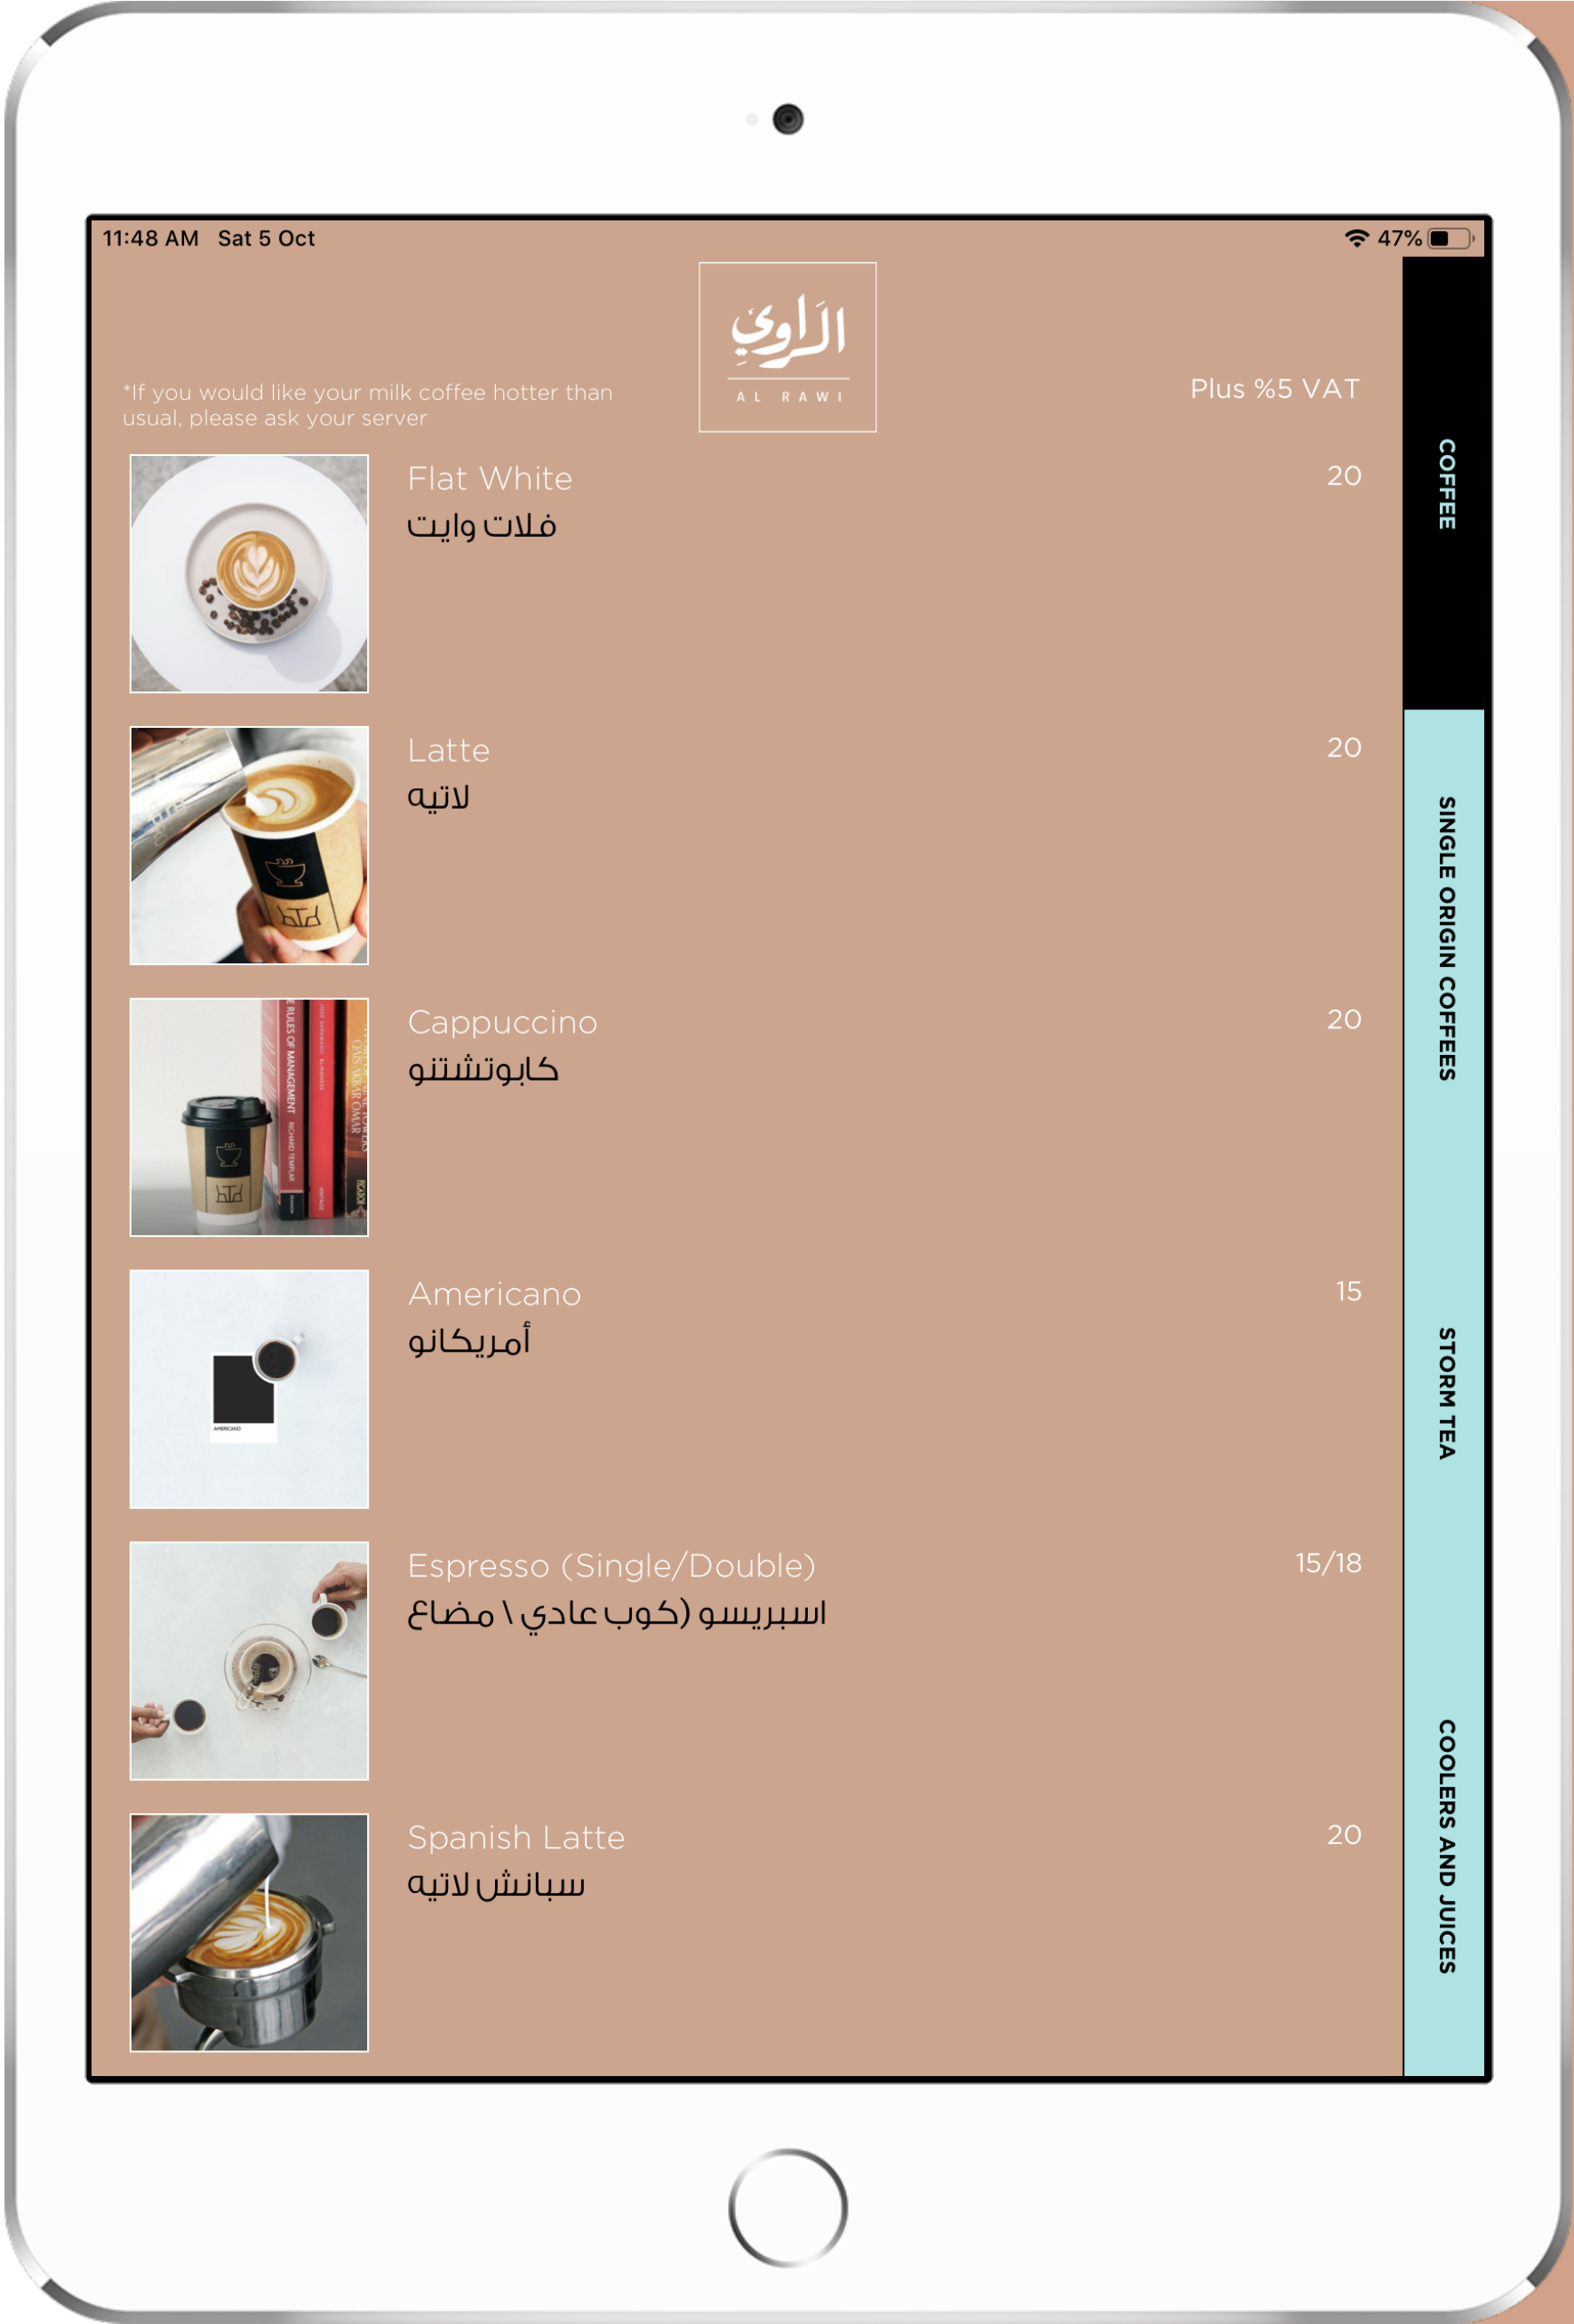

Navigate through different menus, categories and items.

APPETISING TO THE EYE

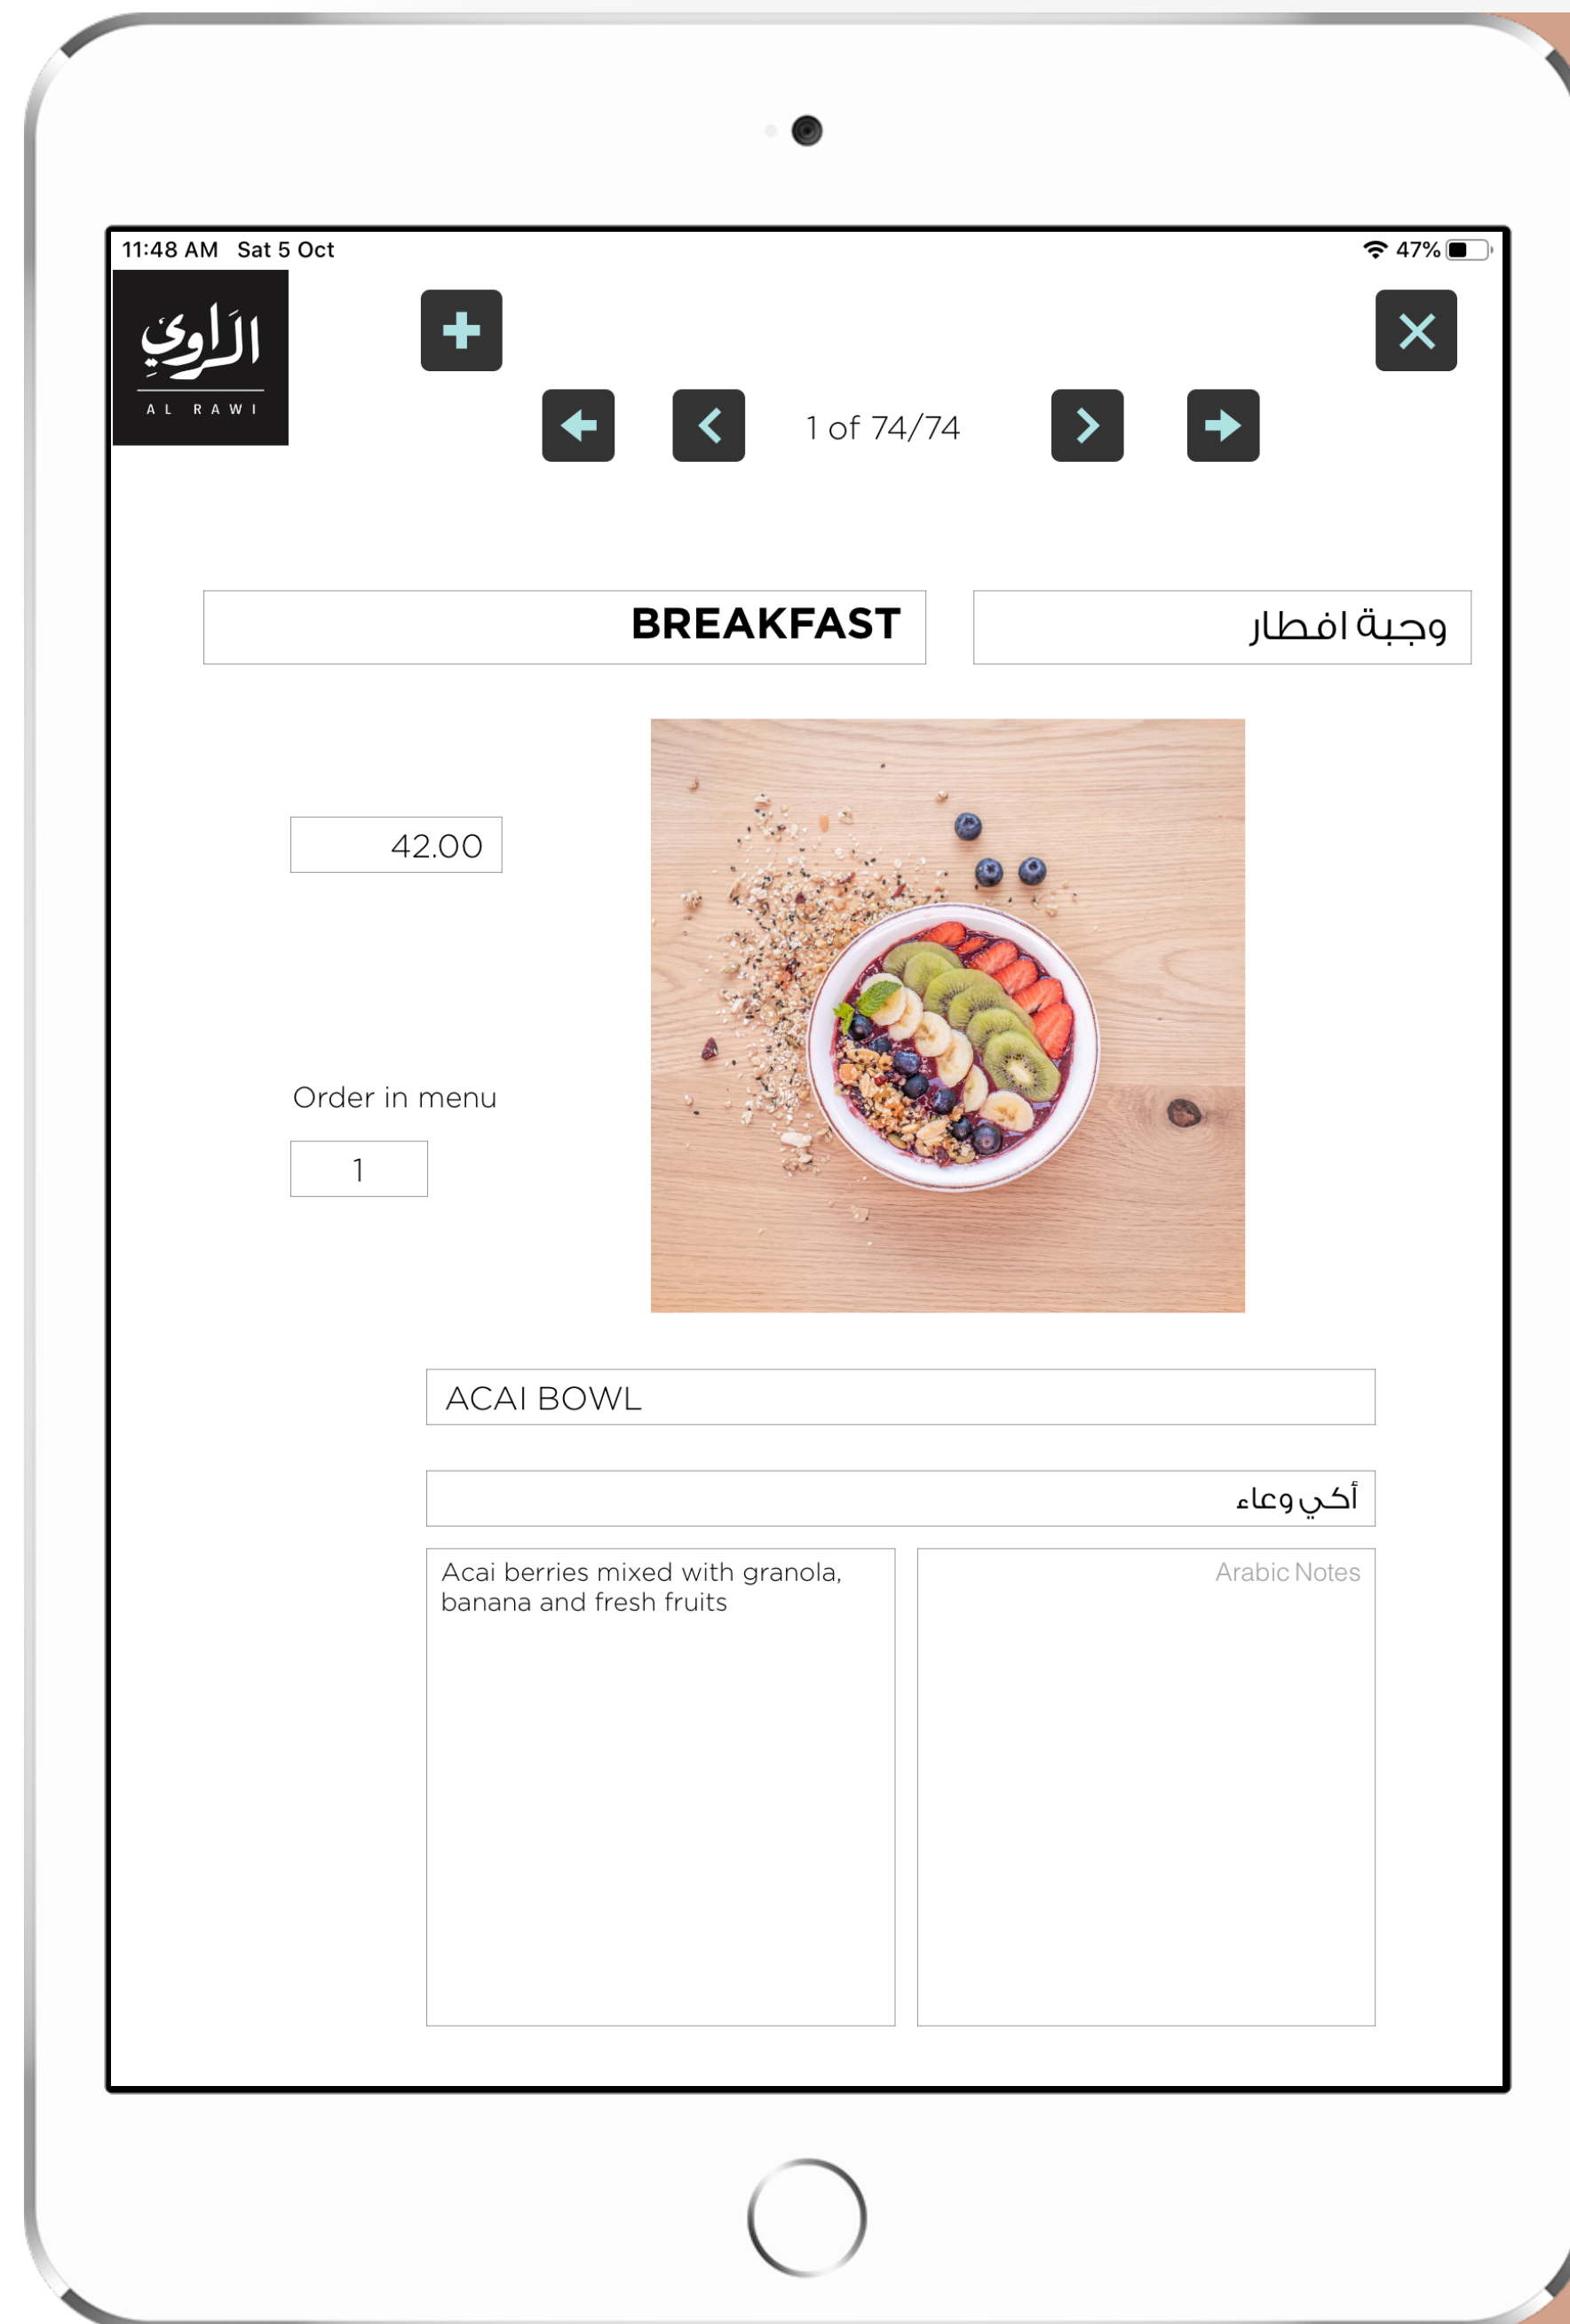

Just tapping on the food item displays a larger appetising picture of the selected food.

You can also view the description of your food item in this mode.

SWITCH TO DRINKS

Tapping on the logo takes you to the drinks menu.

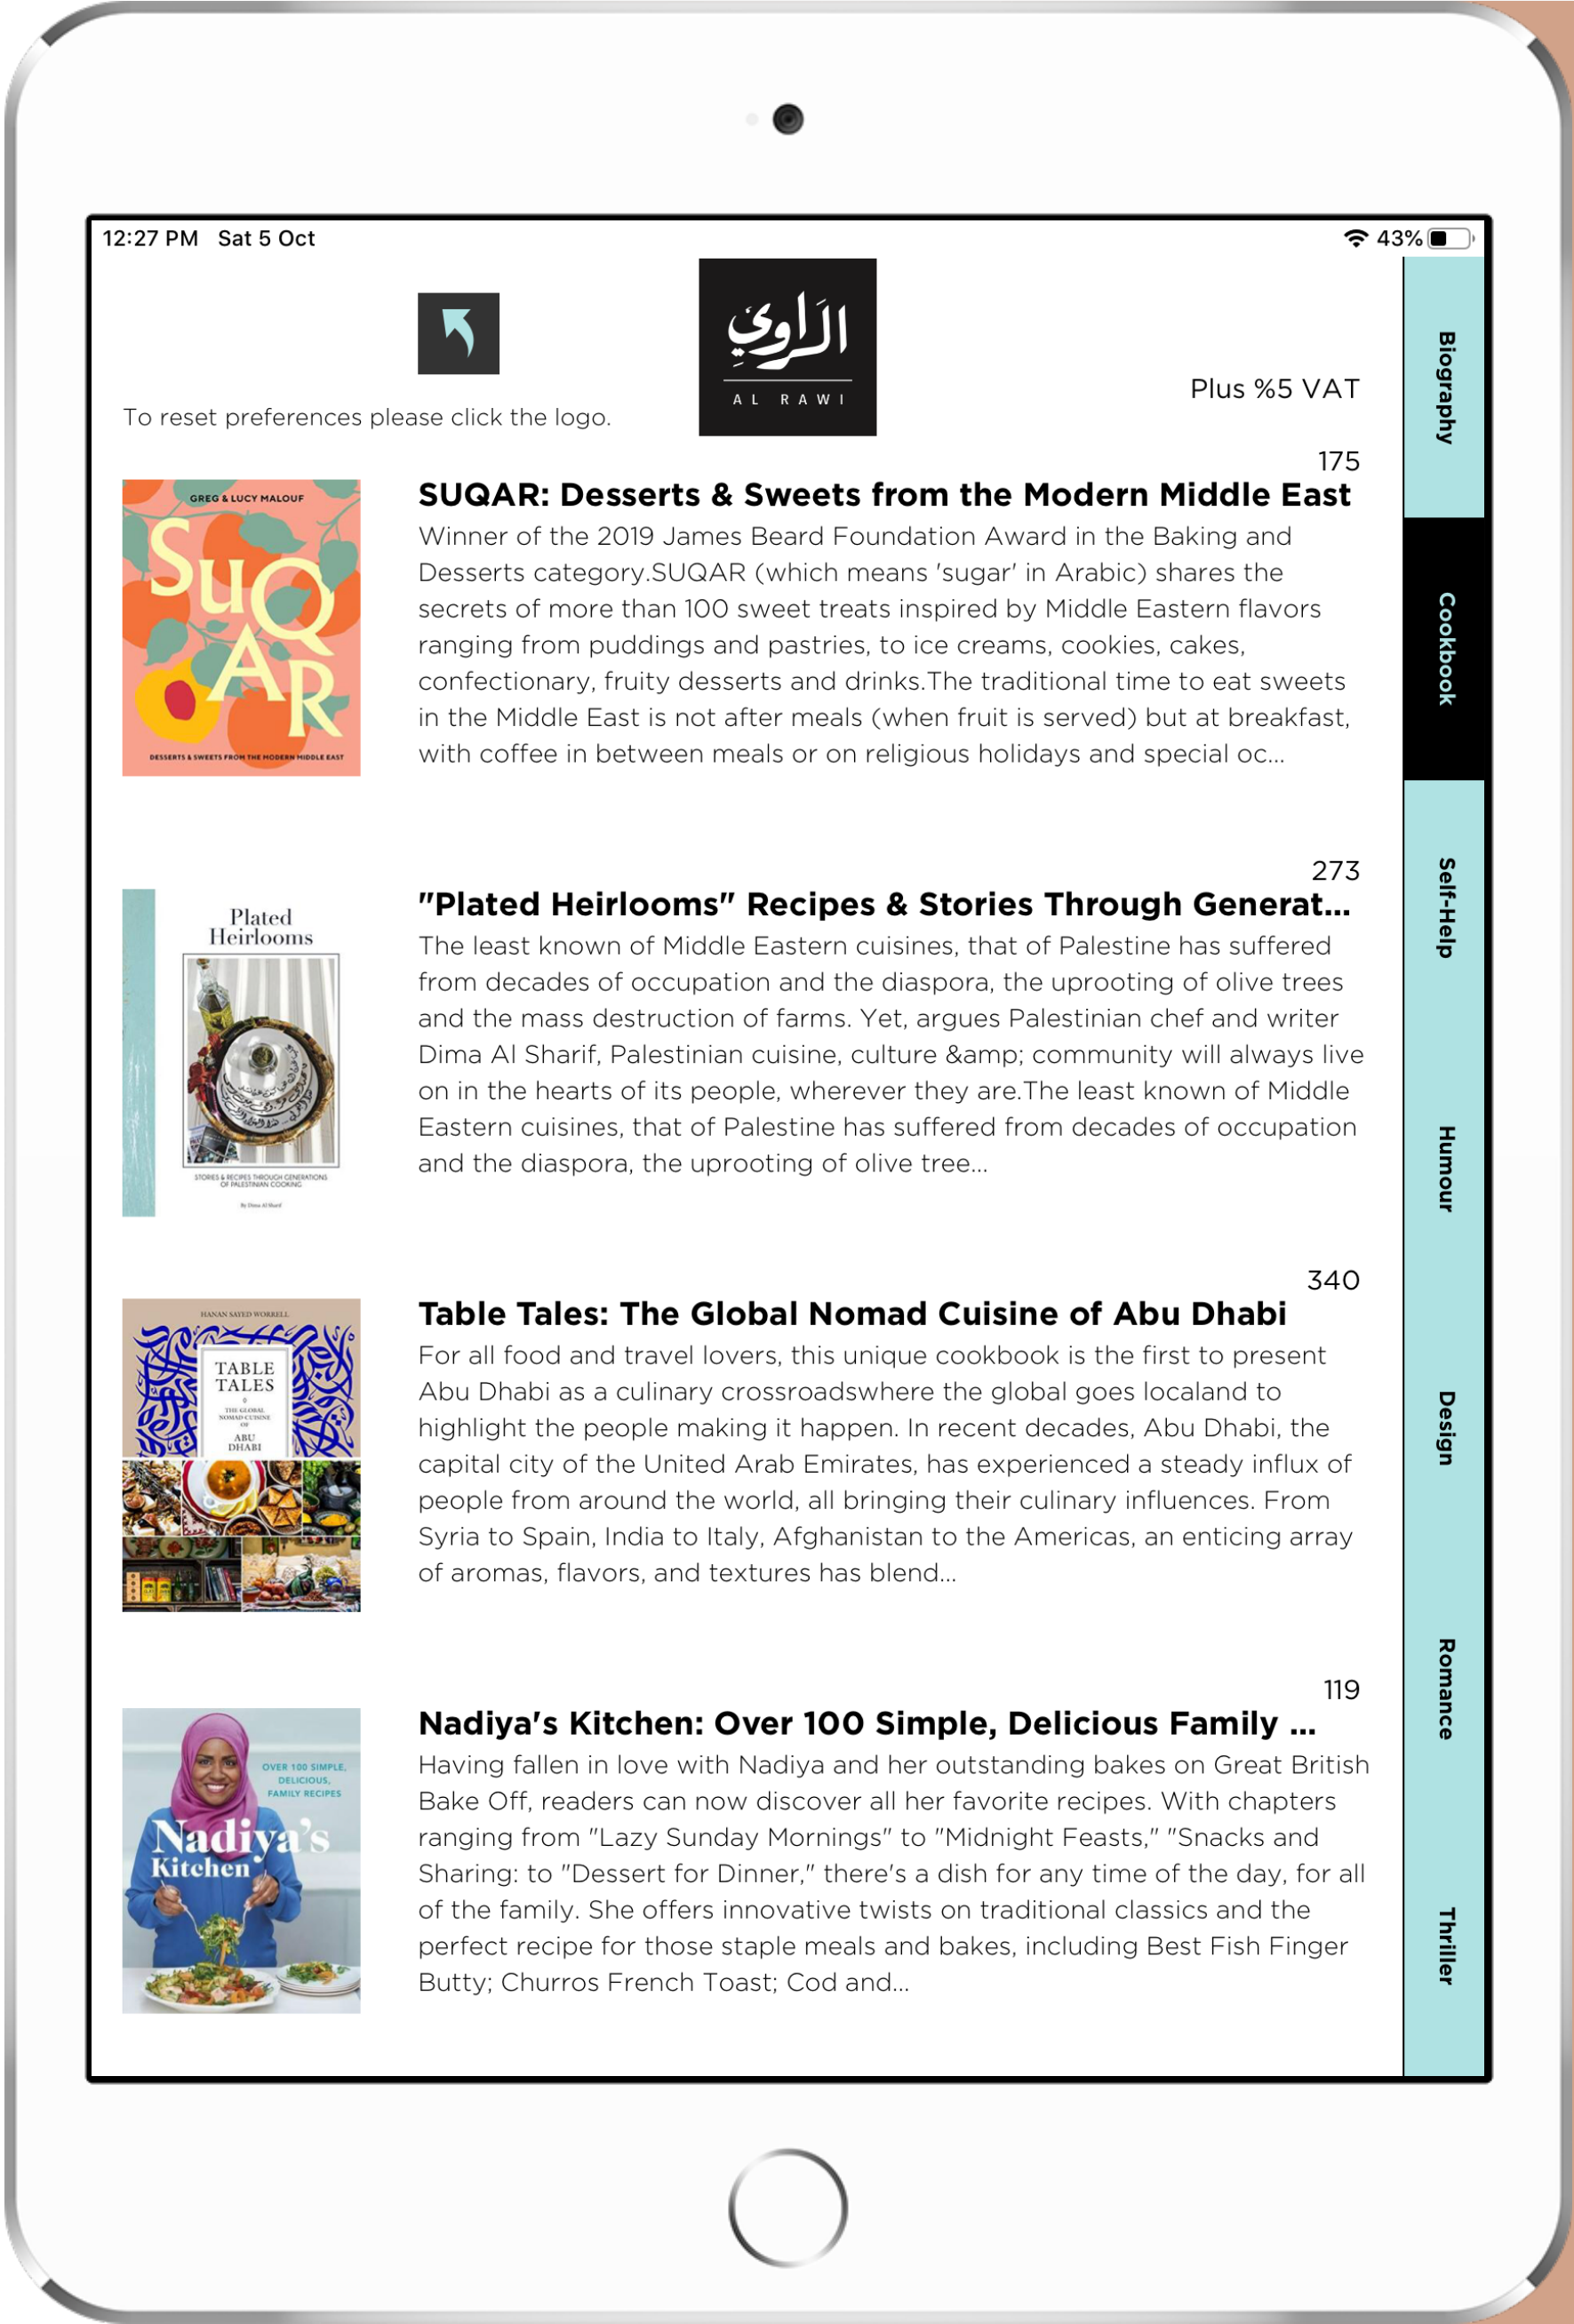

EDIT YOUR MENU

Edit your foods and drinks' prices, name, description, category, both in English and Arabic.

Navigate easily through all your entries and edit in which order you want the items to display.

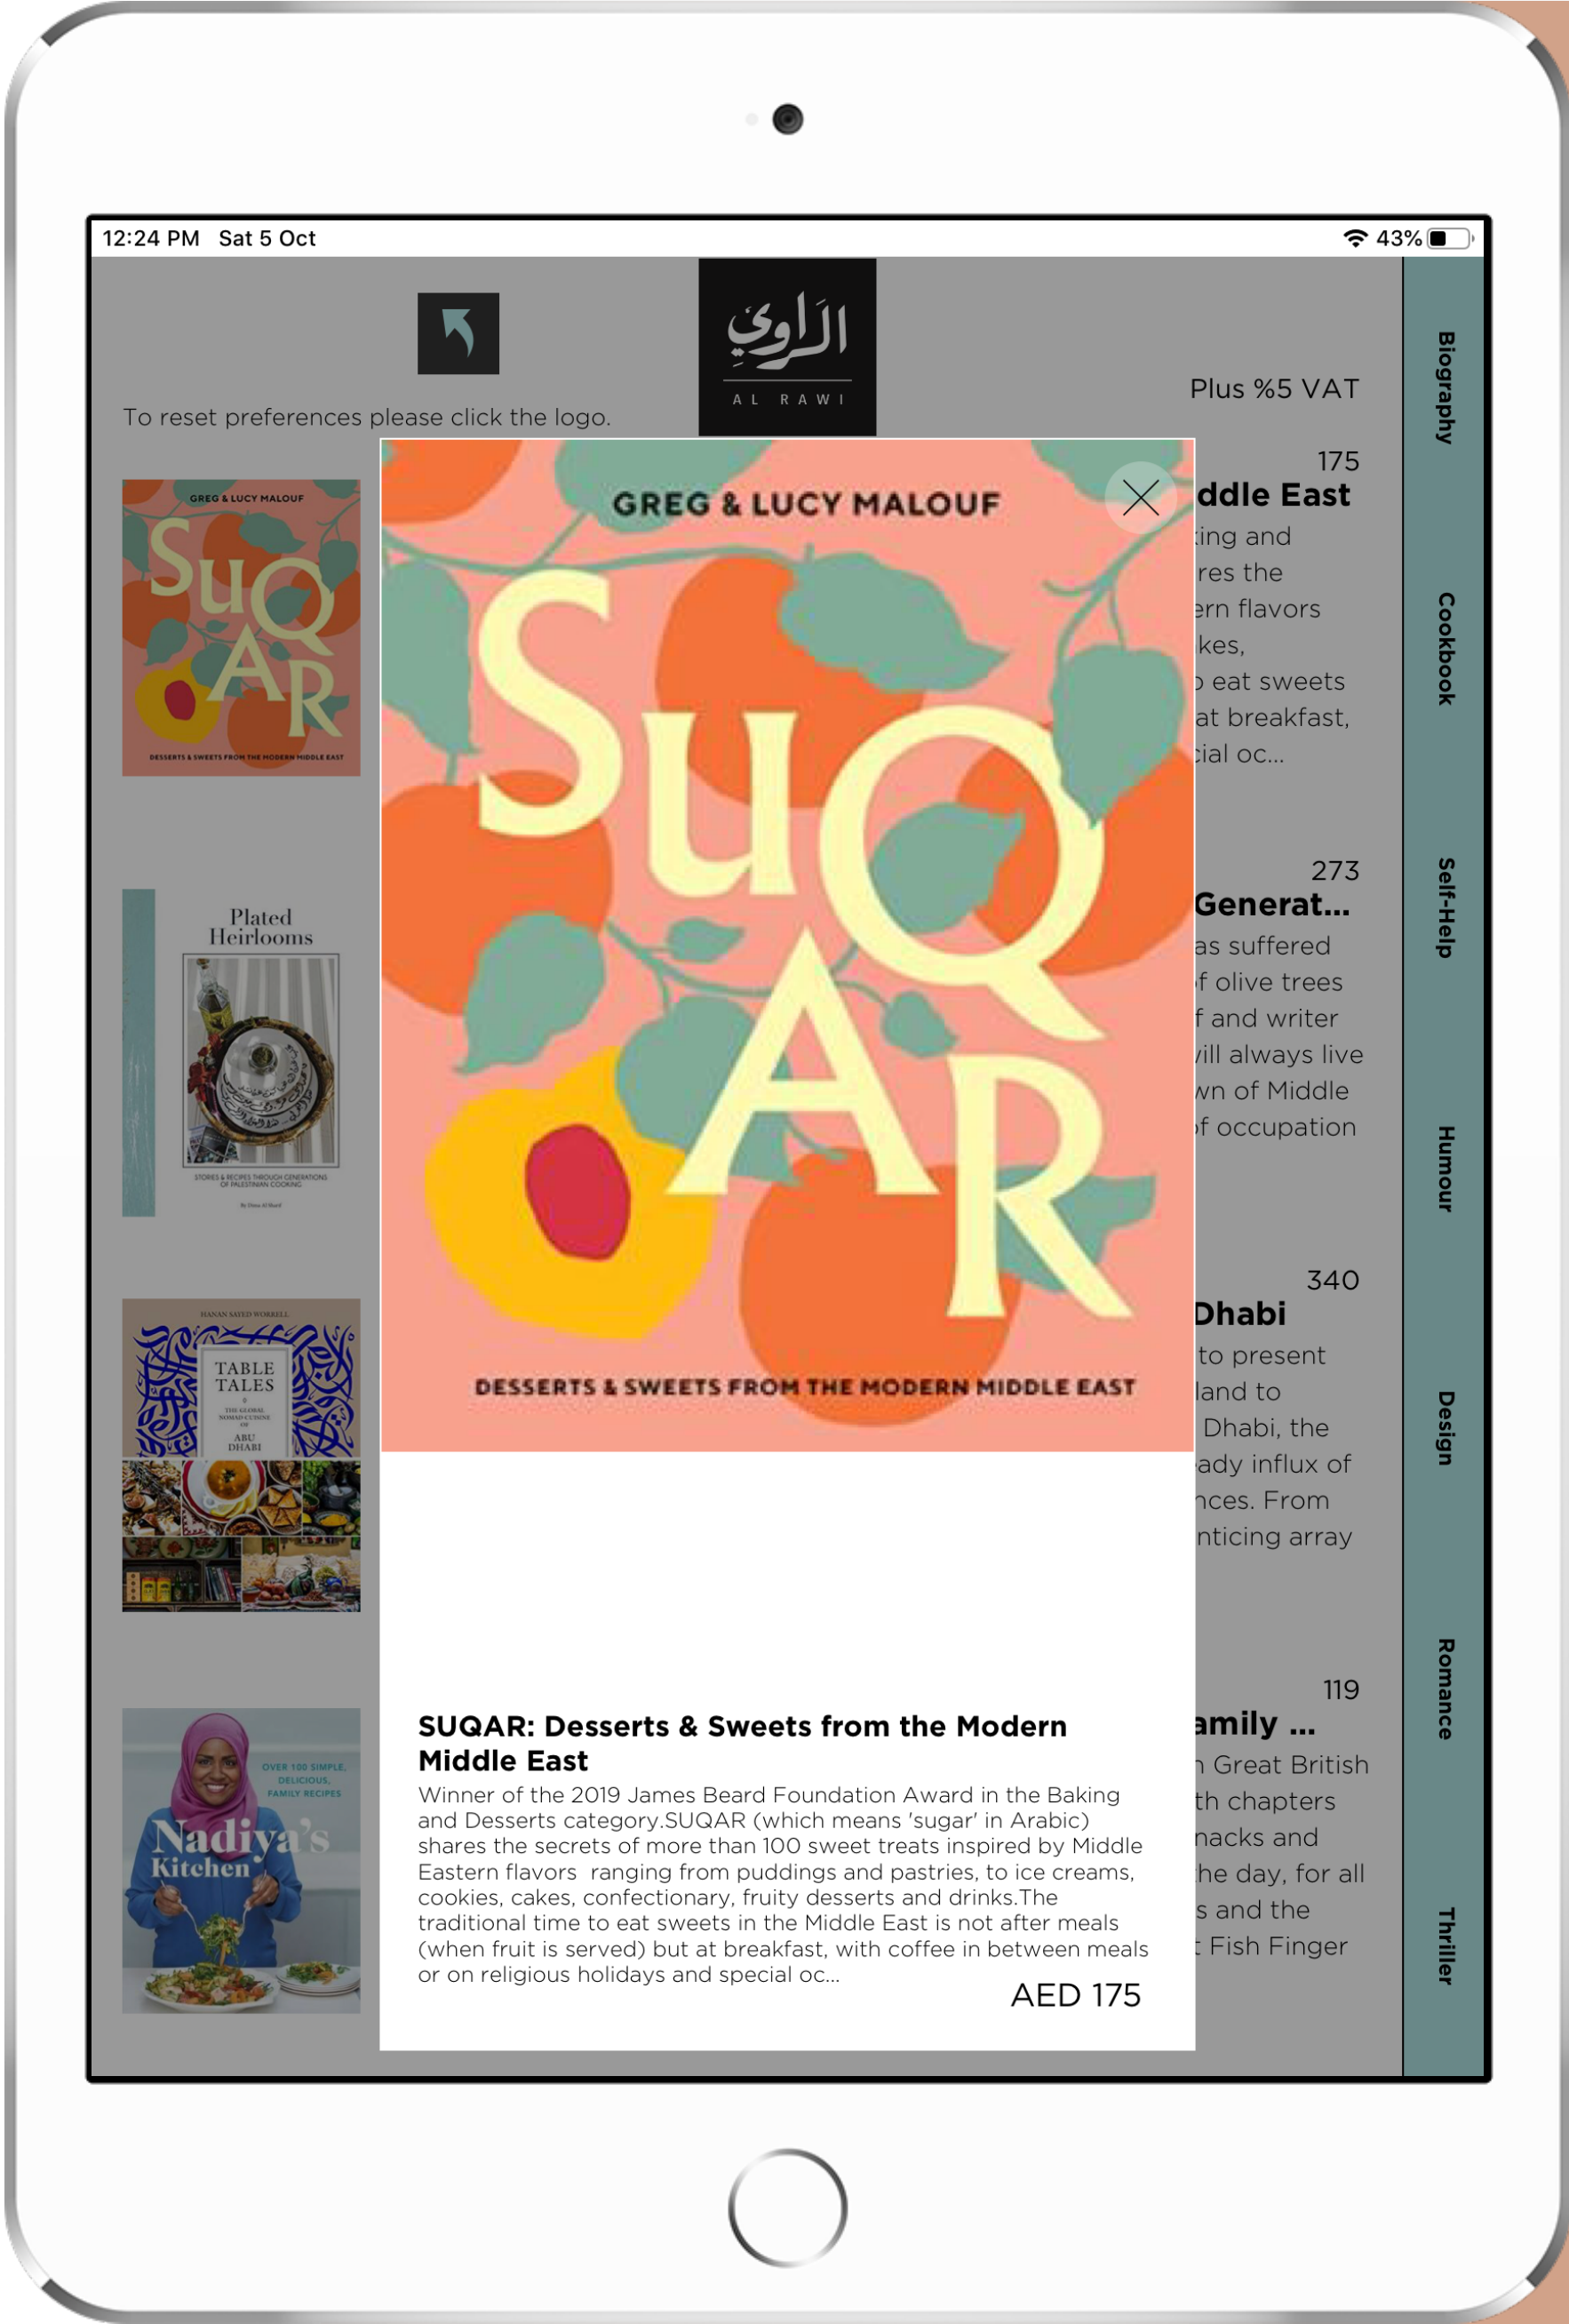

BOOK MENU

ADD YOUR BOOKS

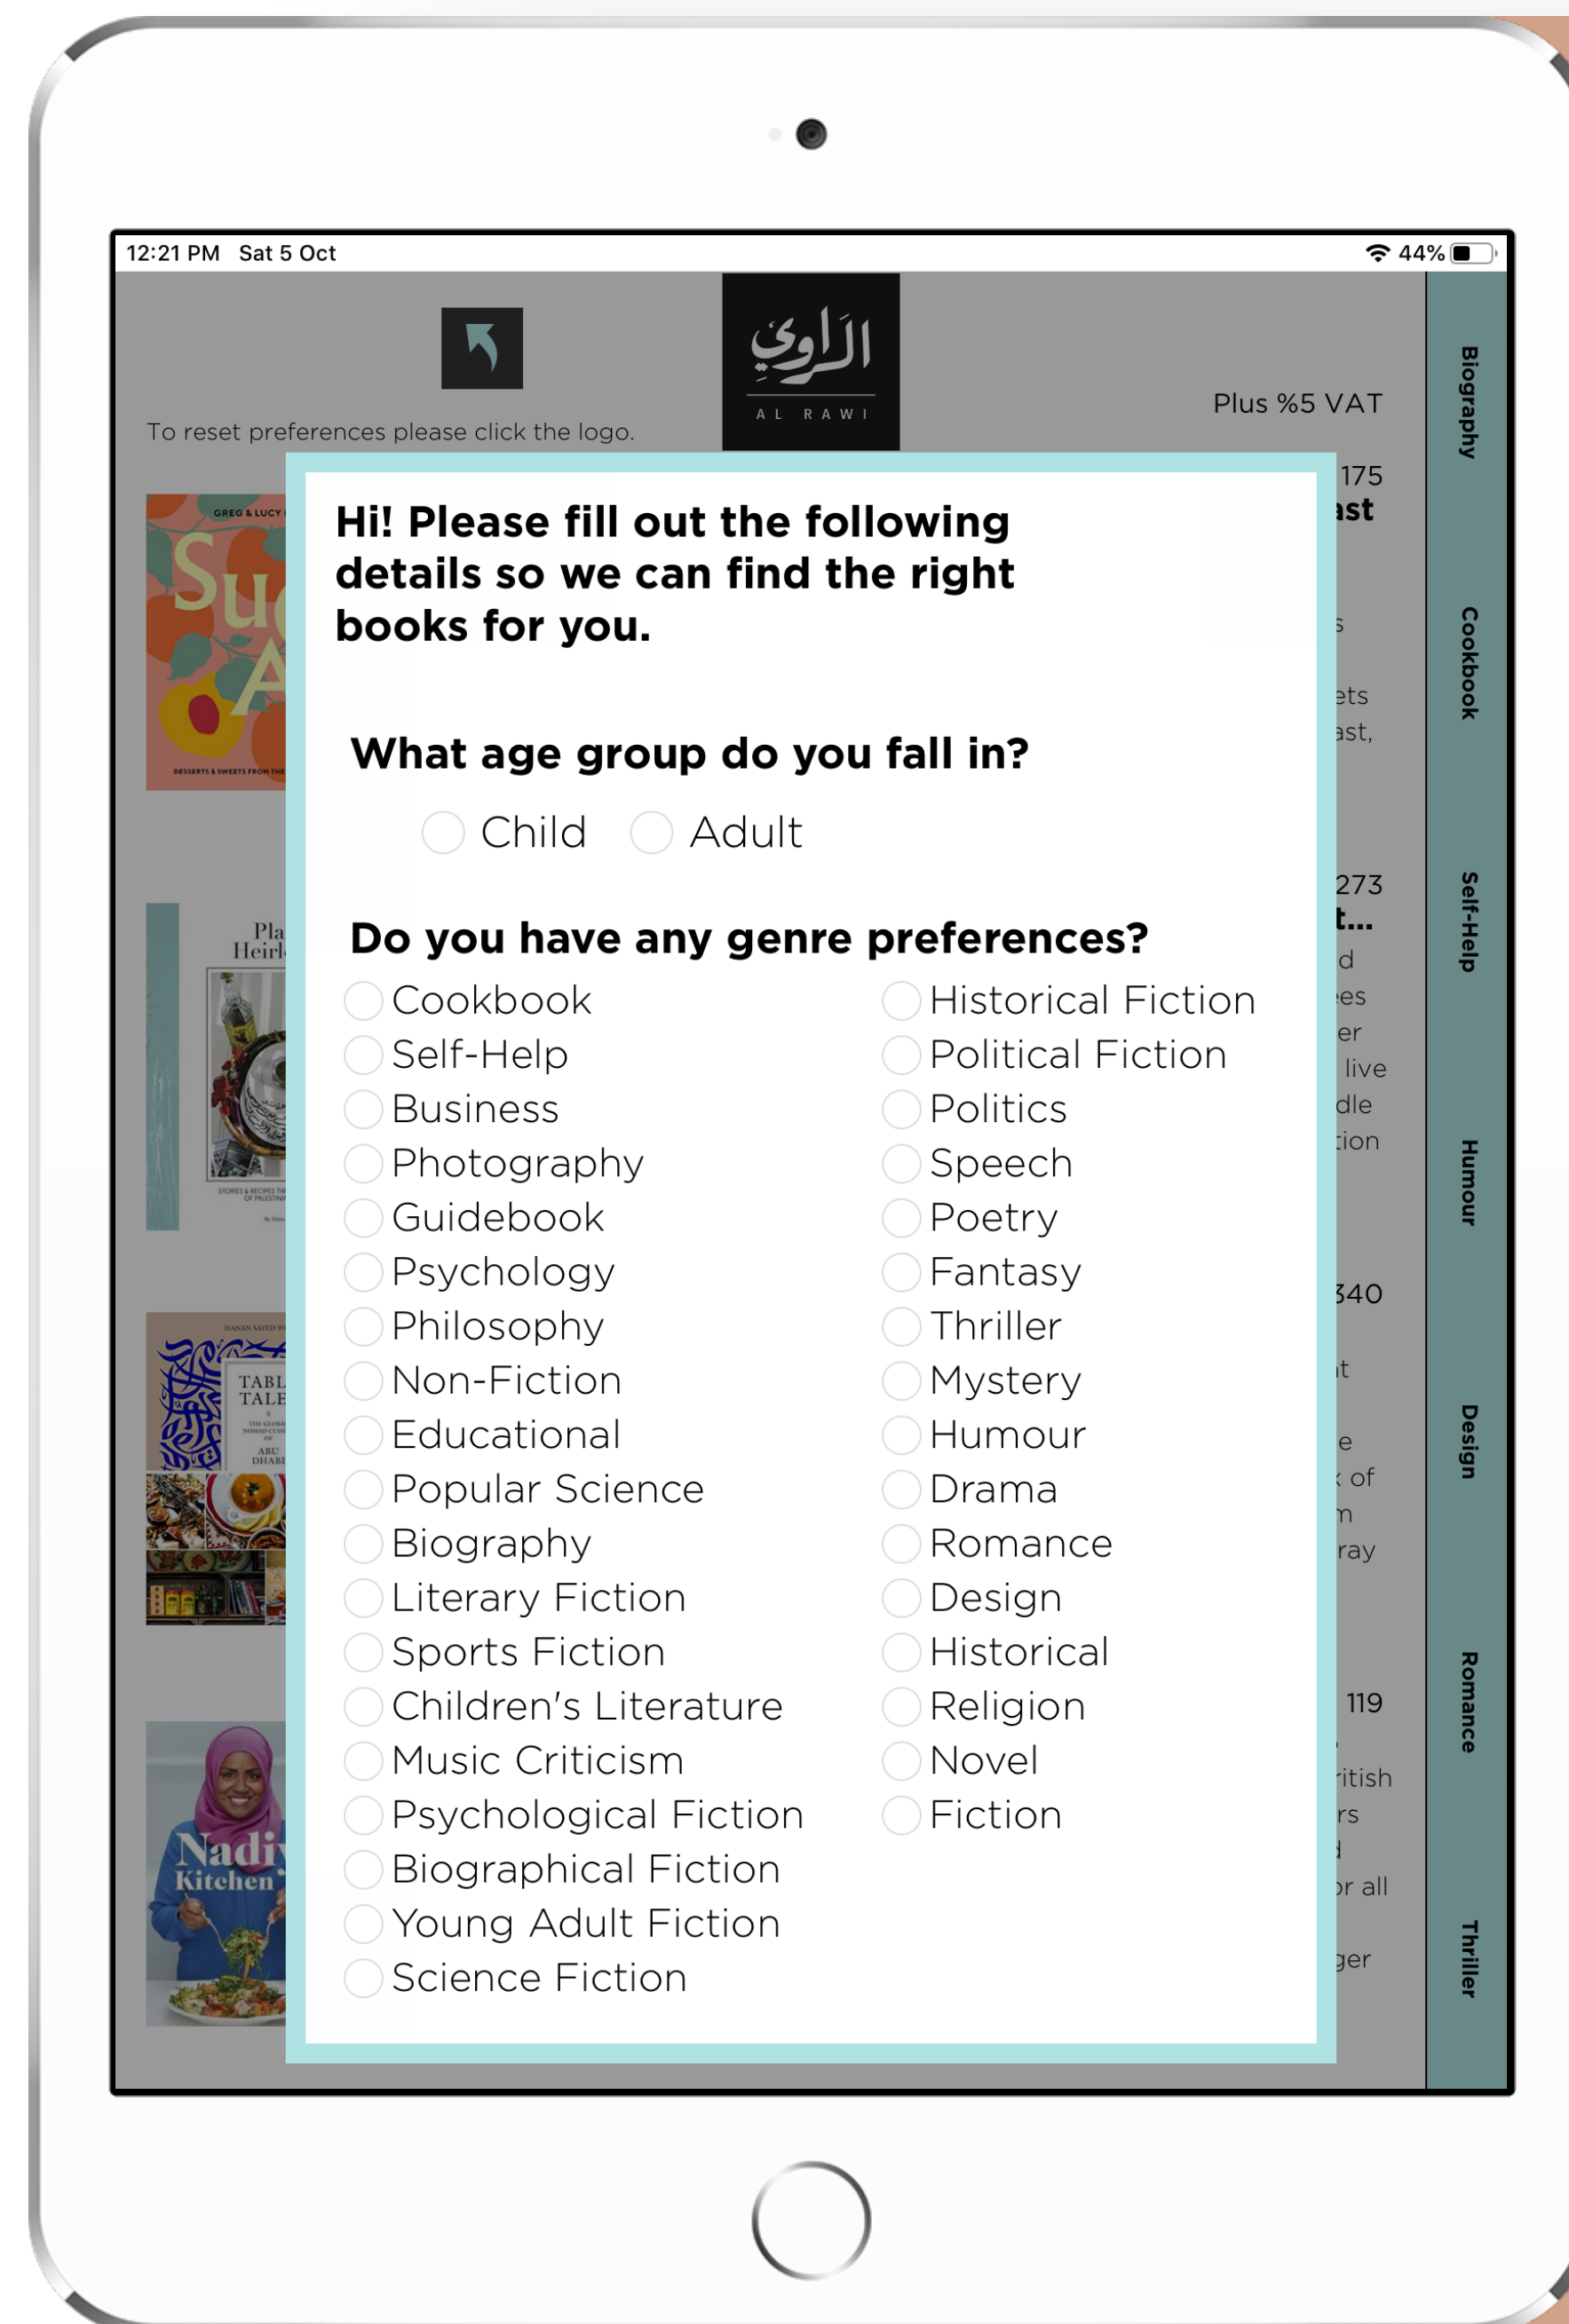

Display books that are available for the customer to read.

Similar to the food and drinks menu, you can easily navigate through the different genres and back to the food menu.

READ ALL ABOUT THE BOOK

Observe the front cover of the selected book and read the written description of the book.

FIND THE RIGHT BOOK FOR YOU

Fill out what age group you fall under and your genre preference.

The app will automatically find whatever books suit you.

BENEFITS OF CUSTOM IPAD SOLUTION

- Interactive iPad increase sales by an average of 20%
- They improve customer service and retention
- They improve order handling and expediting
- They allow for a more sharp focus on customers' needs
- They vastly improve customer awareness and up-selling of items
- They are more affordable in the long run than paper menus
- They are the next evolutionary step for ALL restaurants and bookstores

THANK YOU

Special thanks and appreciation for the opportunity and support
